Bromsgrove branch

Little Hands
Hold big futures.

Our Bromsgrove branch, opened in September 2023, has a wealth of inviting and inspiring natural environments for your child to explore. We are conveniently located in the heart of Bromsgrove town centre, on Chapel Street, making access to multiple transport links and your commute simple and straightforward. Our learning environments, providing the highest quality of care and education for up to 64 children each session, are incredibly well-equipped for children from birth to five years. There are four spacious play spaces for your child to explore.

We have designed extremely well considered environments for children between birth to two years, two to three years and three to five years. All children have access to our welcoming, natural outdoor environment, where they will find an abundance of sustainable and natural outdoor equipment. The layout of our environments aim to motivate children to make decisions about what they would like to play with and develop great confidence and independence as they play and explore. Children are able to move freely between our environments throughout the day, with the close support of their nurturing key person, who ensure they are incredibly well prepared for their stage of learning.

In addition to dedicated rooms for each age group, we also have a further learning environment which has been designed with calm and comforting areas to encourage children to learn and explore through their senses. In addition to this, the space will be used to ensure children receive close interaction and support from their key person, to fully extend and build on their development.

Our fees

Effective from 1st April 2026

Sessions

Full day (7.30am-6pm)	**£83.50**
Half day (7.30am-1pm)	**£51.00**
Half day (1pm-6pm)	**£51.00**

Please speak to a member of our team for further details about funded sessions, as well as costs for additional hours and essentials and extras.

NEW FOR 2026!
LIMITED TERM-TIME SPACES*

*T&Cs apply

"Both management and staff have been outstanding from the start of our daughter's journey at Little Hands Daycare. She has built exceptional relationships with staff, especially her key person. Since starting nursery, her development and progress has been breathtaking. We are so thankful we chose such an amazing nursery for her to attend."

Parent of a child (2025)

Medication

At Little Hands, we ensure that each child receives care that meets their individual needs. We understand that sometimes medication may be prescribed and will need to be taken at nursery. However, in order to keep each child safe, we have procedures in place to ensure safe administration. Below are some of the ways in which we ensure this is the case. Medications may only be used for the child whose name appears on the medicine; this includes emergency adrenaline injections. Parents must give prior written permission for the administration of medication. Children must not be given any medication until they have been in the setting for at least 4 hours. Medicines must remain in their original container and under no circumstances be decanted into alternative containers. Little Hands Daycare are unable to administer medication that has not been prescribed by a medical professional. For example, Calpol or children's paracetamol cannot be administered in the event of teething or a cold and can only be given in emergency circumstances such as a high temperature.

Security

Little Hands Daycare is fully secured to protect all children who attend. Access to the setting is available from the main double doors from the car park. Parents and visitors must ring the doorbell near the main doors, where a member of our staff team will greet on entry and admit them into the building. Only authorised persons detailed on children's registration forms, who staff are familiar with, will be allowed to gain access to the setting. In order to ensure maximum safety and security for children, staff and parents, only staff members of Little Hands Daycare must admit people in to the building. Risk assessments are located in all areas of the nursery including the outdoor environment. Each risk assessment is individual to each area to ensure that safety and hygiene standards have been considered to the highest level. Moreover, 100% of our staff routinely undertake Paediatric First Aid training so that trained staff are always available throughout the day to deal with any medical incidents or emergencies. Our garden is fully secured by robust fences and gates around the whole perimeter, giving parents peace of mind that their children are kept safe and secure when in our care. In addition to this, the building has a regularly monitored CCTV, fire detection system and emergency lighting. Our management teams carry out regular fire drills so that children and staff members are familiar with the procedures in the event of an emergency.

Parking

Safe parking is available directly outside our building, in addition to the short-stay car park adjacent to our nursery, where parents can benefit from 30 minutes of free parking. There are five car parking spaces allocated for drop offs and collections, and these spaces are reserved for parents only. As Chapel Street and the surrounding roads can be busy, we request that parents make safe use of these allocated spaces when dropping off and collecting their children from nursery. With safety in mind, we ask all parents please carefully consider their family's safety if choosing to use the public car parking spaces situated in the short-stay car parking and ensure that the pedestrian crossing is used at all times when parking and travelling to the setting. When using the nursery car park, we request that all parents ensure that the traffic turning out of the car park receives right of way, thus meaning parents are able to safely come and go to drop off and collect their children with ease. With this in mind, we also kindly request that parents do not block the drive or entranceway of the nursery car park, or other cars in, in order to prevent congestion or delaying others.
